Interested In Their Learning!

The value of knowledge and experience that comes from an internship is invaluable. This program will help our interns integrate their institutional learning with hands on experience. It will increase the interns effectiveness as they will be planting the next generation of churches in America. It will benefit NPEA as we continue to help develop a larger pool of church planters. Most of us understand the value of learning. If you are a teacher, a coach, a parent, a grandparent, or just a disciple of Christ (which translates into one who is a life long learner). You understand the importance of learning!

Investing In Their Future!

NPEA would like to hire an intern every year for a 6 month period of time. It will be the responsibility of the intern to raise 3 months of their salary while we supply the other three months. The cost for NPEA will be approximately \$3,000 a year. This is a cost that we need to underwrite from individual or church donations. This is a small investment that will reap very large returns. We are only interested in providing internships for those that will eventually help plant churches in the future.

Invegorated To Assist Them!

Yes I would be very interested in supplying a financial gift for this program.

I will give a one time gift of \$100.00, \$250.00, \$500.00,
other \$_____.

I will give a monthly gift of \$25.00, \$50.00, \$100.00,
other \$_____ for one year.

NPEA will send you a monthly newsletter with all the information you need.
