Project Partners: Funding a Specific Church Plant

Project Partners!

In Luke 14:28, Jesus says that before we start a project we need to count the cost and determine how much it will take to complete it. Starting churches is costly. Evangelistic associations must count the cost and determine what financial resources will be needed to successfully plant a church.

Right now the average cost of starting a new church in our region, (which does not include church

Your one time gift will help build new churches!

become self-supporting in 3.2 years.

planters' salaries), ranges from \$65,000 to \$100,000 — a small price to pay for a church that can

Your Commitment!

As a Project Partner you will give a one-time substantial financial gift that will be earmarked and go into a startup fund for a new church. It typically takes between \$65,000 to \$100,000 to start a church in the upper Midwest.

It takes many different tools and methods to start new churches!

The startup costs vary depending on the size of town and what type of marketing techniques you use. Keep in mind that the startup costs do not reflect the salaries of the church planters. That is another cost.

Your one-time financial gift will help us raise the needed funds to launch new churches.

Your Blessing!

To be able to say your financial contribution actually helped birth a new church is a not only a great honor, but something that tremendously pleases God.

There is nothing more exciting than to know you invested in the best evangelistic strategy for saving souls there is! God will be pleased and smiling at the effort you are making to reach a lost and dying world. Please check out your benefits of becoming a Gold, Silver, or Bronze club member.

You are a
blessing to us!
